Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

- 1) In response to the interview on 1/25/07 the prior rejection has been withdrawn and a new grounds of rejection is set forth below.

Claim Rejections - 35 USC § 103

- 2) The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

- 3) Claims 28, 31, 33 and 36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bull (4696320) in view of "Machined Springs are Cut out for Custom Jobs" 8/17/2000.

Bull provides a relief valve device where the spring force is used. Please note that when using or designing the valve in various applications, it is desirable to have a valve with a different spring rate for varying applications.

The article teaches a method of machining a spring rate to be within 0.33% of a target spring rate. Please note that the article teaches cutting portions of a bar or stock to reach the desired spring rate.

It would have been obvious to one of ordinary skill in the art at the time of the invention to have modified provided the spring of Bull with a coil spring as taught by the

Art Unit: 3683

article merely to provide a spring which will operate to the designed pressure, and further to ensure reliability.

Response to Arguments

4) Applicant's arguments with respect to claims 28, 31, 33 and 36 have been considered but are moot in view of the new ground(s) of rejection.

5) Any inquiry concerning this communication or earlier communications from the examiner should be directed to Devon C. Kramer whose telephone number is 571-272-7118. The examiner can normally be reached on Mon-Fri 8-4.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James McClellan can be reached on (571)272-6786. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
